This is a fascinating finding, as it tells us that vocabulary growth is drastically affected by the amount children read. By age 15, this has resulted in a difference of 5,000-6,000 words between each level, and children who read "lots" have almost double the vocabulary of children who read "not much". Obviously, this will affect school performance, SAT scores, and so on and it's a ...

The high frequency word lists contain the words found in children's reading books in order of the frequency in which they occur. If students were to learn just the words contained on the very first list (words 1 to 100), they will have learned half of all the words they will come across in children's reading materials! They are especially good lists for ELL and ELD students and are great to ...
