Definition. Hazard Statements (H-Statements) are part of the Globally Harmonized System of Classification and Labeling of Chemicals (GHS). Hazard statements provide standardized wording to indicate the hazards of a product including, when appropriate, the degree of the hazard.

Thermal expansion is the tendency of matter to change its shape, area, and volume in response to a change in temperature.. Temperature is a monotonic function of the average molecular kinetic energy of a substance. When a substance is heated, the kinetic energy of its molecules increases. Thus, the molecules begin vibrating/moving more and usually maintain a greater average separation.

Corrosion for Engineers Chapter 10: EROSION CORROSION page

The water molecule is an asymmetric top, that is, it has three independent moments of inertia. Rotation about the 2-fold symmetry axis is illustrated at the left. Because of the low symmetry of the molecule, a large number of transitions can be observed in the far infrared region of the spectrum. Measurements of microwave spectra have provided a very precise value for the O-H bond length, 95 ...

J.J.H. van den Akker, B. Soane, in Encyclopedia of Soils in the Environment, 2005 Bulk Density, Porosity, and Packing State. Bulk density (the mass of soil solids per unit volume) is the most direct and easy-to-measure indicator of changes in compactness, but changes in packing state can be better quantified by total porosity or void ratio. The relation between porosity (especially ...
