Financial economics is the branch of economics characterized by a "concentration on monetary activities", in which "money of one type or another is likely to appear on both sides of a trade". Its concern is thus the interrelation of financial variables, such as prices, interest rates and shares, as opposed to those concerning the real economy. It has two main areas of focus: asset pricing (or ...

Financial economics - Wikipedia

For the application of engineering economics in the practice of civil engineering please see this article.. Engineering Economics, previously known as engineering economy, is a subset of economics concerned with the use and "...application of economic principles" in the analysis of engineering decisions. As a discipline, it is focused on the branch of economics known as microeconomics in that ...

In the wake of the financial crisis, economic policy-making has been predominantly monetary rather than fiscal. Unorthodox countercyclical policies such as quantitative easing “ large-scale purchases of government bonds by central banks “ have evolved into enduring features of economic policy frameworks.
