A resistor is a passive two-terminal electrical component that implements electrical resistance as a circuit element. In electronic circuits, resistors are used to reduce current flow, adjust signal levels, to divide voltages, bias active elements, and terminate transmission lines, among other uses. High-power resistors that can dissipate many watts of electrical power as heat, may be used as ...

Influence is the application of power to accomplish a specific purpose. Research shows that people typically try to lead and/or influence others using ten positive influence techniques: logical persuading, legitimizing, exchanging, stating, socializing, appealing to relationship, consulting, alliance building, appealing to values, and modeling.
