General Responsibility Assignment Software Patterns (or Principles), abbreviated GRASP, consist of guidelines for assigning responsibility to classes and objects in object-oriented design. It is not related to the SOLID design principle.. The different patterns and principles used in GRASP are controller, creator, indirection, information expert, high cohesion, low coupling, polymorphism ...

Jerome Saltzer and Michael Schroeder were the first researchers to correlate and aggregate high-level security principles in the context of protection mechanisms [Saltzer 75]. Their work provides the foundation needed for designing and implementing secure software systems. Principles define effective practices that are applicable primarily to architecture-level software
