### **Overview of Rehabilitation - Jones & Bartlett Learning**

Rehabilitation is the Treatment of Physical Disabilities. Rehabilitation is the process of assessing a Resident to identify their problems (Diseases, weaknesses, abnormal movements / postures etc). These problems are prioritised based on the Residents functional needs. i.e. their leg pain is stopping them walking therefore making it a high priority compared to an old football injury causing occasional shoulder pain.

### **Principles of Rehabilitation | AHCN**

Rehabilitation medicine is a specialty that cares for individuals with disabilities. It incorporates the biopsychosocial model into caring for individuals with certain chronic medical conditions, focuses on a person's function in an individualized plan and is often delivered by a team of

### **Clinical Practice of Physical Medicine & Rehabilitation**

Norre and Telian and Shepard expanded on the principles of Cawthorne and Cooksey and today vestibular rehabilitation, as it has come to be known, is a well established and accepted intervention for persons with balance and vestibular disorders.

### **Physical Therapy Principles in Rehabilitation**

This edition has two separate volumes on Physical Medicine and Rehabilitation Medicine. Each volume has sections on principles of evaluation and management, management methods, major problems, and specific disorders. Treatment algorithms and boxed lists of key clinical facts have been added to many chapters.

The approach of neurological rehabilitation extends the intellectual challenge of neurology; in most clinical  
situations the physician and the wider rehabilitation team have to make pragmatic decisions based on  
incomplete information concerning many important factors.
