of identity and privacy might be tempted to apply blanket privacy rules to identity management systems to address the privacy risks that those systems create. For example, "collect as little information from individuals as possible" might seem like a rule that could help protect the privacy of participants in an identity management system.

Identity management framework needed " Now, we have an identity management patchwork. " As security is only as good as the weakest link of the chain, privacy is at most as good as the most privacy-invasive "layer" you are using. " Therefore, an identity management patchwork will not lead to secure and privacy-enhancing identity
