

process driven soa patterns pdf

Event-driven architecture (EDA), is a software architecture pattern promoting the production, detection, consumption of, and reaction to events.. An event can be defined as "a significant change in state". For example, when a consumer purchases a car, the car's state changes from "for sale" to "sold". A car dealer's system architecture may treat this state change as an event whose occurrence ...

Event-driven architecture - Wikipedia

A service-oriented architecture (SOA) is a style of software design where services are provided to the other components by application components, through a communication protocol over a network. The basic principles of service-oriented architecture are independent of vendors, products and technologies. A service is a discrete unit of functionality that can be accessed remotely and acted upon ...

Service-oriented architecture - Wikipedia

Design an SOA solution using a reference architecture. Improve your development process using the SOA solution stack

Design an SOA solution using a reference architecture

The architectural style and principles. The architecture style defining a SOA describes a set of patterns and guidelines for creating loosely coupled, business-aligned services that, because of the separation of concerns between description, implementation, and binding, provide unprecedented flexibility in responsiveness to new business threats and opportunities.

Service-oriented modeling and architecture - IBM

The term "Microservice Architecture" has sprung up over the last few years to describe a particular way of designing software applications as suites of independently deployable ...

Learn about transaction processing systems, processing systems components, and different service-oriented architecture approaches including representational state transfer.

Transaction processing system examples and SOA approaches

This guide provides links to background information to help you understand BPMN and various articles to help understand the context in which BPMN is being used. In addition, there are links to a number of articles exploring the interplay of BPMN and BPEL and roundtripping. This is one of the most exciting areas spanning the standards based world of business modeling and SOA development.

Business Process Modeling Notation Mini-Learning Guide

This page provides links to my books and web-based writings. Over the years I have published a fair bit of information, some of which is contradictory (although the advice fits the context), on several sites.

Introduction. As part of the series of posts announced at this initial blog post (.NET Application Architecture Guidance) that explores each of the architecture areas currently covered by our team, this current blog post focuses on “Microservices and Docker containers: Architecture, Patterns and Development guidance”. Just as a reminder, the four introductory blog posts of this series will ...
