psychologists. In other words, quantitative methodology research helps to improve the nature of the analyses being conducted by psychologists. Commonly these contributions are found in psychology journals that pertain to quantitative methods (e.g., Psychological Methods), and the hope is that researchers are reviewing the literature that addresses issues relevant to their research.

An important area of emphasis in gerontological research over the past several decades has been the issue of life satisfaction. Questions about the physical, psychological, social, and economic status of older adults have served, either directly or indirectly, as the predominant focus of the aging research (e. g., Maddox and Wiley, 1996).
