### **The Human Eye and The Colourful World, Physics Chapter**

Thus, the deficient light passing out of the container is orange in colour. However, as the reaction proceeds, more and more colloidal particles of sulphur are formed. These sulphur particles then join to form bigger sulphur particles. These bigger particles scatter red colour and hence the light coming out of the container is crimson red.

### **The Human Eye and the Colourful World - JSUNIL TUTORIAL**

Thus, each colour of light travels with different speeds in a given medium. The speed of red colour is more than the speed of orange colour in a medium. The speed of orange colour is more than the speed of yellow colour and so on. Therefore, the speed of red colour in a medium is the highest and the speed of violet colour is the least.
