

topics in antibiotic chemistry pdf

This is a list of some of the articles related to chemistry.

List of chemistry topics - Simple English Wikipedia, the

An antibiotic is a type of antimicrobial substance active against bacteria and is the most important type of antibacterial agent for fighting bacterial infections. Antibiotic medications are widely used in the treatment and prevention of such infections. They may either kill or inhibit the growth of bacteria. A limited number of antibiotics also possess antiprotozoal activity.

Pharmaceutical Quality/CMC - Food and Drug Administration

Biphenyl (also known as diphenyl, phenylbenzene, 1,1'-biphenyl, lemonene or BP) is an organic compound that forms colorless crystals. Particularly in older literature, compounds containing the functional group consisting of biphenyl less one hydrogen (the site at which it is attached) may use the prefixes xenyl or diphenylyl.. It has a distinctively pleasant smell.

Biphenyl - Wikipedia

Troponin tests are primarily ordered to help diagnose a heart attack and rule out other conditions with similar signs and symptoms. Either a troponin I or troponin T test can be performed; usually a laboratory will offer one test or the other.

A bacterial wound culture is a test that detects and identifies bacteria that cause infections in a wound. Any wound may become infected with a variety of bacteria. A culture helps to determine whether a wound has become infected, which type(s) of bacteria are causing the infection, and which antibiotic would best treat the infection and help heal the wound.
