A New Kind of Science is a best-selling, controversial book by Stephen Wolfram, published by his own company in 2002. It contains an empirical and systematic study of computational systems such as cellular automata. Wolfram calls these systems simple programs and argues that the scientific philosophy and methods appropriate for the study of simple programs are relevant to other fields of science.

Bankers Extended WWI By Three Years - According to Eustace Mullins, Edith Cavell had stumbled upon some damaging information. On April 15, 1915, The Nursing Mirror in London published her letter revealing that the Allied "Belgian Relief Commission" (charged with feeding Belgium) was in fact channeling thousands of tons of supplies to Germany.

Explanation. Things like golf scores, the earth's temperature, and chronic back pain fluctuate naturally and usually regress towards the mean. The logical flaw is to make predictions that expect exceptional results to continue as if they were average (see Representativeness heuristic). People are most likely to take action when variance is at its peak.
