Architecture Definitions - Bredemeyer

Business transaction management (BTM), also known as business transaction monitoring, application transaction profiling or user defined transaction profiling, is the practice of managing information technology (IT) from a business transaction perspective. It provides a tool for tracking the flow of transactions across IT infrastructure, in addition to detection, alerting, and correction of ...

Your visit here tells us you are interested in exploring a career with AD/S Companies (Architectural Designs and Signs) and we couldn't be happier!

AD/S Companies

Architecture is both the process and the product of planning, designing, and constructing buildings or any other structures. Architectural works, in the material form of buildings, are often perceived as cultural symbols and as works of art. Historical civilizations are often identified with their surviving architectural achievements.

Capturing requirements is difficult. Capturing architecturally significant requirements is particularly difficult. This article discusses the root causes of this difficulty, and suggests a systematic approach to capturing architectural requirements to ensure that these elusive, and yet extremely important, system specifications are not overlooked.

Capturing Architectural Requirements - ibm.com

Enterprise software applications are designed to facilitate numerous business requirements. Hence, a given software application offers hundreds of functions and all such functions are generally piled into a single monolithic application.
