Sustainability is the process of maintaining change in a balanced fashion, in which the exploitation of resources, the direction of investments, the orientation of technological development and institutional change are all in harmony and enhance both current and future potential to meet human needs and aspirations. For many in the field, sustainability is defined through the following ...

Circles of Sustainability is a method for understanding and assessing sustainability, and for managing projects directed towards socially sustainable outcomes. It is intended to handle 'seemingly intractable problems' such as outlined in sustainable development debates. The method is mostly used for cities and urban settlements. Circles of Sustainability, and its treatment of the social ...

by Robert Engelman...We are far from a world in which all births result from intended pregnancies. Surveys show that approximately 40% of pregnancies are unintended in developing countries, and 47% in developed ones.

## **WOA! - How to Attain Population Sustainability**

The concept of sustainable development from 1980 to the present has evolved into definitions of the three pillars of sustainability (social, economic and environmental).

## **How to understand and measure environmental sustainability**

The difference between urban resilience (UR) and urban sustainability (US) are discussed. The Sea Gate project of New York harbor is used as a case study to demonstrate that UR and US can be contradictory.

Abstract: Soil health, along with water supply, is the most valuable resource for humans, as human life depends on the soil's generosity. Soil degradation, therefore, poses a threat to food security, as it reduces yield, forces farmers to use more inputs, and may eventually lead to soil abandonment.
