Value added, Productivity and Performance of few Selected

The traditional measure of labor productivity "output per hour" was first published in 1959, and represents the culmination of a long series of developments in productivity

Productivity Measures: Business Sector and Major Subsectors

In this paper I consider the relation between gross output " and value added "based total factor productivity (TFP) measures. It appears that, without any (micro-)economic theory being required, a conditional relationship between TFP indices can be derived, in which the Domar factor plays an important role.

ON THE RELATION BETWEEN GROSS OUTPUT " AND VALUE ADDED

Incremental real value added would have been six times the observed change, and true labor productivity in the industries would have risen 363% over 11 years.
