A telephone, or phone, is a telecommunications device that permits two or more users to conduct a conversation when they are too far apart to be heard directly. A telephone converts sound, typically and most efficiently the human voice, into electronic signals that are transmitted via cables and other communication channels to another telephone which reproduces the sound to the receiving user.

IIRC 380 is the same load limitation in the evo ecus. There is a patch for them which doubles this but most people will never near 66lbs/min. I might have said this before but besides air/fuel/timing changes I think the biggest thing is the built in EBC that we've been neglecting forever because we can't control it.
