to niche overlap between wolves and foxes. A high degree of niche overlap is expected to lead to higher rates of interference competition, including spatiotemporal avoidance, kleptoparasitism, and direct killing. We hypothesize that this will cause wolves to suppress coyotes, and coyotes to suppress foxes, more than wolves suppress foxes.

### **Wolves and foxes | Etsy**

Wolves are different from domestic dogs in that wolves usually have slimmer chests, longer legs, and they also have stronger jaws than those of the domestic subspecies. The difference in appearance from the wolf to the domestic dog becomes even larger when a mix of the two animals is created.

### **Canid hybrid - Wikipedia**

Wolves and foxes belong to the same Canidae family but are different in many respects. There are differences in the size, behavior, and hunting methods. A fox is medium sized and comes with a narrow snout and fluffy tail. A fox is much smaller than wolves and is even smaller than all others in the ...

### **Difference Between Wolves and Foxes | Difference Between**

Canid is the term used to describe animals that share similar genes with dogs such as coyotes, wolves, and foxes. They all have genetic similarities, suggesting a common ancestor. Domesticated Dogs are also a part of this family but show to have intermixed with wolves continually, while other canids usually mated within their gene pool.
