Working with axes, labels, gridlines, and other chart elements

Working memory is a cognitive system with a limited capacity that is responsible for temporarily holding information available for processing. Working memory is important for reasoning and the guidance of decision-making and behavior. Working memory is often used synonymously with short-term memory, but some theorists consider the two forms of memory distinct, assuming that working memory ...

Working Tax Credit (WTC) is a state benefit in the United Kingdom made to people who work and have a low

income. It was introduced in April 2003 and is a means-tested benefit. Despite their name, tax credits are not to be confused with tax credits linked to a person's tax bill, because they are used to top-up wages. Unlike most other benefits, it is paid by HM Revenue and Customs (HMRC).

Working Document on Binding Corporate Rules for Processors

The term “tipping point” commonly refers to a critical threshold at which a tiny perturbation can qualitatively alter the state or development of a system. Here we introduce the term “tipping element” to describe large-scale components of the Earth system that may pass a tipping point. We critically evaluate potential policy-relevant tipping elements in the climate system under ...
